PROFILE

Enthusiastic and self-motivated. I began to be fascinated in web development, specifically Front-end development back in 2008. I gained experience in this area by working on multiple challenging projects and I am always keen to gain even more experience and knowledge. My strongest technical skills are writing code in HTML5, CSS3 and Javascript and all the appropriate frameworks and libraries. In the last three years, I have mastered the use of React.js / Redux, which I deeply enjoy it. Very often, I indulge my passion for designing. Building digital products is not just a job for me, it's a passion and a hobby at the same time.

COVER LETTER

Dear **Sir/Madam**,

My name is Bojan and I am writing this cover letter as part of my application for the front-end developer position. I believe that the qualities you seek match my skills and qualifications. I am an experienced web developer with more than 10 years of professional experience who is not afraid to find solutions to technical challenges, while at the same time I am being creative in developing visually appealing websites. I am always eager to keep up with modern build practices and technical standards.

I have advanced knowledge of different web development and hybrid mobile app development technologies and outstanding creativity, communicative skills, critical thinking, and problem-solving skills. Having worked as a front-end developer for the last decade and more, I believe I am skilled in all aspects of the job. I have designed, developed, and launched a number of highly responsive websites using advanced technologies.

I am excited to be applying to this job posting and the opportunity to be a member of the team. It would be a pleasure to learn more about the job position, and I'd also welcome the chance to provide further insight into my technical abilities.

Feel free to contact me directly should you require anything further.

Thank you for your time and consideration.

Looking forward to hearing from you.

Sincerely,
Bojan Churlinov
